

16. CONTINGENCY PLANNING. List information necessary in the event that current management or disposal options fail, such as:

- a. List all disposal/transfer facilities within a 50-mile range of the installation.

WHAT IF...?

The ISWMP should evaluate the adequacy of current disposal mechanisms and contain provisions for alternate disposal mechanisms in the event that the present facilities fail to meet disposal needs. It is recommended that prior arrangements or agreements be made with regional or local disposal facilities to confirm that a backup option exists. Participation in local planning boards may further secure the installation's interests in disposal contingency planning.

- b. Provide an up-to-date list of POC's at commercial waste hauling or disposal facilities.
- c. List Federal (EPA), state, and local solid waste management office and contacts.
- d. List POC's at other military installations within reasonable distance of the installation, particularly those operating onsite landfills. *(Note: it is Army policy that installation-operated landfills not accept wastes from outside sources. This is provided for emergency/ contingency planning only).*
