

GUIDE FOR DEVELOPING INTEGRATED SOLID WASTE MANAGEMENT PLANS AT ARMY INSTALLATIONS

1. GENERAL.

a. Basis for Guide. This technical guide was developed to assist Army installations in meeting the requirements for developing a written Integrated Solid Waste Management Plan (ISWMP). The guide reflects current U.S. Environmental Protection Agency (USEPA) and Army regulations, guidelines, and philosophies. This guide covers the relevant issues pertaining to solid waste management and has the flexibility to be tailored to specific installation needs.

b. Guide Format. This guide is structured to mirror the organization of an ISWMP, beginning with the following section, APPLICABLE REGULATIONS AND REFERENCES. An outline format is presented to facilitate conversion to an actual plan. Each section provides suggested information that the writer should include. Also included are text boxes containing additional useful information. It may be appropriate to include similar explanatory text in the ISWMP to strengthen the plan as an educational and promotional tool.
